The new professional equipment for the
compaction of slabs and paving stones

batroller B8

Batroller is the smart equipment, designed by Batmatic, for the laying of outdoor flooring. It is used particularly for planks, slabs, concrete blocks and natural stone, ensuring a professional compaction at the highest level.

Simple, innovative, easy to handle

✓ Batroller can be installed on all plate compactors from 16 to 30 kN

✓ Two vibrating plates in one: Batroller makes your forward plate a reversible plate

✓ Thanks to the roller width and the feed speed, working times are reduced up to 60%

✓ Easy to handle = Less effort for the operator

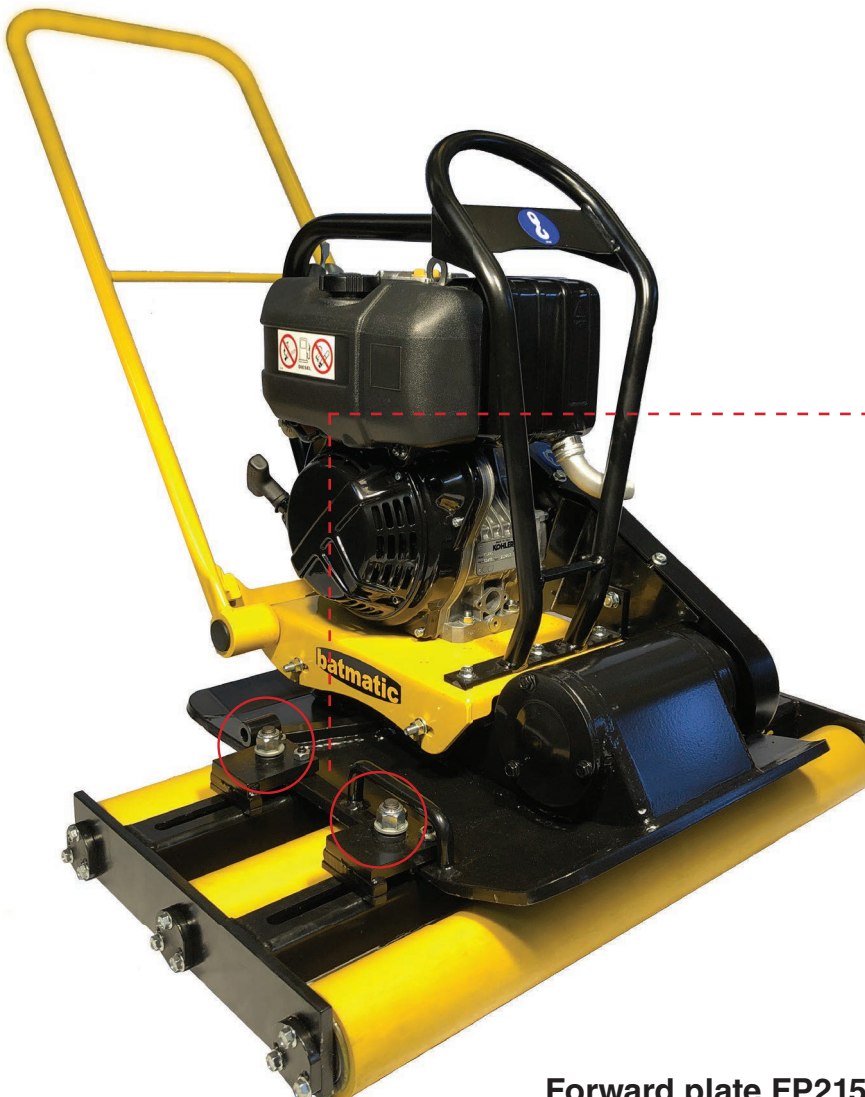

✓ The innovative coating of the rollers avoids breakage and chipping of the most delicate materials

✓ Rollers do not move the flooring, cutting out repositioning time
